Specification

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: There is no basis in the original specification for the specific thickness range of 1/8 inch - 3/16 inch for the taper of the forefoot member as claimed in claim 7.

Claim Rejections - 35 USC § 112

2. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 the phrase "lateral wedge member is confusing, vague, and indefinite because it is not clear what disclosed structure applicant is referring to. Especially since in claim 7 applicant further claims a tapered bottom sole member.

Claim 6 appears to duplicate claim 4 from which it depends rendering is confusing as to what further structural limitations applicant intends to encompass with such language.

Art Unit: 3208

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Blissett (5448839).

5. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Talarico, II (4620376).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1-4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Noone (4866861) in view of Lyne (2179942).

Noone shows a shoe with a forefoot lateral wedge (20) and a heel counter (figure 3) with a lateral heel stabilizer (62) substantially as claimed except for tapering the forefoot lateral wedge.

Art Unit: 3208

Lyne teaches tapering a protruding wedge (see figure 6). It would have been obvious to taper the wedge of Noone as taught by Lyne to provide a smooth transition between the sole and the wedge.

8. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Blissett in view of Noone.

Blissett shows a shoe with a tapered forefoot member and a tapered heel wedge (see column 3 line 35- column 4 line 6) substantially as claimed except for a forefoot lateral wedge and a lateral heel stabilizer. Noone teaches providing a forefoot lateral wedge (20) and a heel stabilizer (62). It would have been obvious to provide a forefoot lateral wedge and a lateral heel stabilizer as taught by Noone in the shoe of Blissett to make the shoe able to assist a wearer when playing golf.

In reference to claims 2 and 7, Blissett as modified above discloses the claimed invention except for the exact ranges of thicknesses as claimed. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the forefoot wedge $1/8$ - $1/4$ inch thick or $1/8$ - $3/16$ inch, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

9. Telephone inquiries regarding the status of applications or other general questions, by persons entitled to the information, "should be directed to the group clerical personnel and not to the examiners. In as much as the official records and applications are located in the clerical section of the examining groups, the clerical personnel can readily provide status information without
